PROJECT DESCRIPTION: The Eastside Well Collector and Centralized Disinfection Facility project involves installing the infrastructure necessary to transport groundwater from seven wells in the eastern portion of PWP's Jones Reservoir and to provide for centralized disinfection of the groundwater from these wells. To accomplish these objectives, PWP proposes to install 23,587 linear feet of pipeline to collect and transport groundwater from the seven involved wells to the Jones Reservoir site, where a chloramination system would be installed to disinfect the water prior to its storage in the reservoir. The proposed project includes improvements at each of the well sites and a minor improvement to the Jones Reservoir overflow vault.

PUBLIC HEARINGS: No public hearings to consider the proposed project have been scheduled to date. The Pasadena City Council will consider the selection of a contractor(s) for the project components during a City Council meeting on a date to be determined. Regularly scheduled meetings of the Pasadena City Council occur every Monday at 6:30 p.m. at Pasadena City Hall, Council Chamber, 100 North Garfield Avenue, Room S249, Pasadena, CA 91101.
